MOTION CONTROL TECHNOLOGIES

Il gruppo variatore compatto GVBE è a tutti gli effetti un sistema modulare che integra nel carter in alluminio le pulegge variabili ad interasse fisso della **serie BES**. La progettazione modulare dei gusci carter consente montaggi motore/riduttore sia ad U che a Z. Il sistema permette una notevole flessibilità nell'abbinarlo a svariati elementi di trasmissione quali motore, riduttore, o alberi di rinvio di qualsiasi genere.

A complemento sono fornibili flangie in uscita con interfaccia PAM a norma IEC, piedi di supporto e comandi di regolazione dritti, ad angolo, idraulici o servo comandati elettricamente.

Normalmente sono forniti smontati (richiedere istruzioni per il montaggio al ns. ufficio tecnico), a richiesta sono fornibili anche completi di motore/riduttore.

*The compact GVBE variator group is to all intents and purposes a modular system which integrates **BES series** variable pulleys in the aluminium carter. The geometry of the carters allows both U and Z assembly. The modularity of this system allows high flexibility while coupling it with various transmission elements like motor, reduction unit, or any kind of countershafts.*

We offer output flanges with a PAM interface (in compliance with IEC standards), support feet and straight, angled, hydraulic or electrically servo-controlled adjustment controls.

They are normally supplied disassembled (please do not hesitate to contact our Technical Dept. to get assembly instructions). On request you can receive them full of motor/reduction unit.
